Claims 10-18 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a process including stopping and restarting the relative movement between at least two turn-back positions, does not reasonably provide enablement for a process of stopping and restarting the relative movement which does not include "the at least two turn-back positions". The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. The summary of invention shows these two turn-back positions (See page 6, lines 7-9). Fig. 1 also shows these two turn-back positions and claim 18 should be amended accordingly.

Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. There does not appear to be antecedent basis for the phrase "the adjacent stop points including turn-back points".
